**Besov type function spaces defined on metric-measure spaces. (English summary)**

*J. Math. Anal. Appl.* **505** (2022), no. 2, Paper No. 125508, 17 pp.

Summary: “The purpose of this article is to study the Besov type function spaces for maps which are defined on abstract metric-measure spaces. We extend some of the embedding theorems of the classical Besov spaces to the setting of abstract spaces.”
