**Isometries between spaces of vector-valued differentiable functions II. (English summary)**

*Publ. Math. Debrecen* **101** (2022), no. 3-4, 325–336.

Summary: “This article characterizes the isometries between spaces of  $p$ -times differentiable functions from a compact interval of the real line into a strictly convex Banach space. This article is a continuation of [[MR4200365](#)].”
